12. ECOLOGICAL INFORMATION

Toxicity: *Harmful to aquatic organisms.* Casoron G is approved for the control of weeds in water providing the following is taken into account:
The maximum concentration of dichlobenil in treated water must not exceed 3 ppm or such lower concentration as the appropriate regulatory body may require.
Treated water must not be used for irrigation purposes within two weeks of treatment or until the concentration of dichlobenil in the water is below 0.3 ppm.
Treatment of heavy weed growth in a water body leads to weed decay and deoxygenation. In cases where excess and rapid weed decay arises (the label recommends treatment of no more than 20% of a water body at any one time), deoxygenation of the water can affect fish.
The half-life of dichlobenil in soil can vary from 1-6 months depending on soil type and activity of micro-organisms.
LD₅₀ bobwhite quail (8 days) about 5200 mg/kg diet.
LC₅₀ mallard duck (8 days) > 5200 mg/kg diet.
