

# Linemarking

## The Topline TXE 505 New Improved Version

This classic machine is seen all over the world. It is rugged but simple design offers a combination of performance with economy, which is hard to beat. A series of improvements and refinements have been completed over the years to ensure reliability and consistence performance in all situations.

The TXE features a 25 litre marking liquid tank and is supplied complete with mixing bucket, filtered funnel and wide faced mixing stick.

## **Topline Briteliner** Transfer Wheel Marker

The BriteLiner is a time proven and extremely robust transfer wheel box marking machine which will delight the more traditional Groundsman. Marking liquid is carried on the grooved rubber surfaces on the transfer applied directly to the grass. It is simplicity itself and as long as the machine is properly cleaned after use the operator can look forward to many, many years of trouble free operation.

4" marking wheels  
3" marking wheels

## Supastadia AF

Supastadia AF is highly flowable and stable both in its neat and diluted form, giving the ultimate lines in high profile venues where only the best will do.

Supastadia AF is a major step forward in line marking material technology, taking marking liquids to a higher level.

**Pack size:** 12.5 Litre

For use with transfer wheel machines, TXE 252 and 505 spray marking machines

## Stadia Colours

The Stadia grade is available in all the colours of the rainbow and today is used extensively for multi colour logos on turf surfaces, it is used around the world for this purpose from Australia and South Africa in the southern hemisphere through to Japan and Europe in the northern hemisphere. The base colours of red, blue, yellow and green are ideal for when coloured lines are needed (green being used for covering over a white line if needed).

### User's Tips

As with all Topline products it is good practice to shake the drum well before use and when mixing use a flat faced mixing stick.

Stadia Colours can be used from 1:1 dilution with water up to 1:6. For high quality grass stencil work use at between 1:1 and 1:3. For line marking use at 1:4 to 1:6.

**Pack Size:** 12.5 litre.

For use with TXE 505 linemarkers

## Stadia/Sportsline

Supaturf's classic pioneering water based marking liquid. Subsequently upgraded since it's introduction in 1991 Sportsline has become a bench mark for liquid marking materials. Sportsline is a technically well balanced formulation which offers hard to better performance versus price characteristics. These features make it the product of choice for many contractor's and local authorities with large areas to be marked. Sportsline offers the required standards of whiteness and longevity of line, for multiple recreational outdoor sports facilities.

As with all Supaturf line marking materials Sportsline is environmentally safe and will not harm wildlife, trees and plant material when used as instructed.

**Pack size:** 12.5 Litre

**Pallet quantity:** 50

For use with TXE 505 linemarkers

## U-Mark

U-Mark is a new utility line marking liquid which is designed to give reliable and consistent performance at an economical price. Manufactured to ISO 9002 standards as with all Supaturf marking liquids U-Mark is a multi functional easy to use material. Dilution rates for use on grass surfaces are between 1 to 1 and 1 to 3 with water. U-Mark is suitable for application by spray marking or transfer wheel marking machines.

**Pack size:** 12.5 Litre

**Pallet quantity:** 50

For use with transfer wheel machines

## Dry Line Marking

Dry marking systems offer a low cost and straight forward method to grass and certain other playing surface line marking. The powder coats the blade of grass as well as building up on the soil. This build up reduces the quantity of compound required for overmarking.

### Starliner

Designed for use on grass playing surfaces. Low cost and easy to use. Available with standard or cleated wheels.

## Sportsline Powder

A very popular economical dry line marking compound suitable for all types of dry line markers. Can be used on hard porous as well as turf.

25kg pack

## Snowcal

A dry line marking compound again suitable for all types of dry line marking machines and can be used on hard porous as well as turf.

25kg pack

# Line Marker Perfekt Striper

Mark your parking space,  
warehouses, playground and  
sports fields

## Perfekt striper

### New comfortable handle:

ergonomic handle with strong grip for easier control

### Trigger comfortable

for your fingers

### Spraying device:

The can is maintained in the holder

### Easy and strong locking handle

to adjust line width from 5 to 10 cm + thin line also possible from 3 to 5 cm

### The aerosol twists and fits - Patented device

### The aerosol holder is extra-strong

### Reinforced chassis:

very robust  
The Perfekt Striper's weight (7kg) is the key factor to make straight stripes

**Wide wheels for greater stability:** so that your stripes are perfectly straight and in line

**Windscreen:** ensures perfect line even in windy weather

**Adjustable arrow:** To follow pre-marked line - can also be used to mark on side striper

**Aerosol holder:** For available replacement aerosols

## "Traffic" Paint

- Special formulation with high pigmentation for resistance to soiling, traffic, hydrocarbons and weather. Fast drying formula.

CFC - Free paint, lead-Free.

- Autonomy: approximately 600 m per carton of 12 aerosols depending on the width of the track and soil.
- Available in 7 high impact, resistant colours.

Pack 12 x 500ml

For use with Perfekt Striper

## Star Marker

- **Rotating Safety Cap**  
You don't have to remove the cap to spray
- Only **Star Marker** enables you to mark up to approx. 3,000 metres (3280 yards) per case
- With **Star Marker**, your **line marking** will remain **visible** for longer because we use **the most concentrated paint**.
- **9 colours** available.  
500ml per can, 12 cans per case.

HANDLE AND PISTOL FOR STAR MARKER
